PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience building AI-powered applications using Python, OpenAI APIs, Gemini APIs, LangChain, and Streamlit. Skilled in developing RAG pipelines, semantic search systems, document chatbots, and intelligent recommendation systems. Strong understanding of NLP, embeddings, vector retrieval, machine learning workflows, and API integrations.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript
AI/ML	Scikit-learn, LangChain, OpenAI API, Gemini API, NLP, RAG, Embeddings
Frameworks	Streamlit, FastAPI
Databases	FAISS, ChromaDB (Basic Knowledge)
Tools	GitHub, VS Code, Jupyter Notebook, Apify
Concepts	Semantic Search, Vector Retrieval, Prompt Engineering, ML Pipelines

PROJECTS

AI Job Recommender System

Python, Streamlit, OpenAI APIs, Gemini APIs, Apify

- Built an AI-powered job recommendation system using semantic similarity matching and LLM reasoning.
- Scraped and processed 500+ LinkedIn and Naukri job listings using Apify APIs.
- Developed a Streamlit dashboard for personalized job recommendations based on skills and experience.
- Implemented intelligent filtering and ranking workflows for real-time job discovery.

Smart RAG Document Chatbot

Python, LangChain, NLP, Vector Search, LLM APIs

- Developed a RAG-based chatbot capable of answering questions from PDF and text documents.
- Implemented text chunking, embeddings generation, and semantic retrieval pipelines.
- Built conversational memory handling for multi-turn question answering.
- Improved contextual relevance using vector similarity search.

Machine Learning Projects

Scikit-learn, XGBoost, Pandas, NumPy

- Built end-to-end ML projects including Fraud Detection, House Price Prediction, and Disease Prediction.
- Performed data preprocessing, feature engineering, model training, and evaluation.
- Worked with classification and regression algorithms including Random Forest and Logistic Regression.

EDUCATION

B.Tech in Computer Science Engineering

Vidya Jyothi Institute of Technology | 2021 – 2025

Intermediate (MPC)

Global Junior College | 2019 – 2021

KEY HIGHLIGHTS

- Built AI applications using OpenAI and Gemini APIs.
- Hands-on experience with RAG pipelines and semantic search systems.
- Strong understanding of NLP workflows and machine learning fundamentals.
- Experience integrating APIs and building interactive AI applications.
