

BYAGARI SRIKANTH

Hyderabad, Telangana, India

bsrikanth3934@gmail.com | [GitHub](#)

PROFESSIONAL SUMMARY

Motivated AI/ML Developer with hands-on experience building machine learning applications, AI-powered recommendation systems, and LLM-enabled solutions. Strong foundation in Python, machine learning, generative AI, data preprocessing, model evaluation, and application deployment. Seeking AI Engineer, Machine Learning Intern, or Data Science Intern opportunities to contribute to real-world intelligent systems.

KEY SKILLS

Programming: Python, SQL

Machine Learning: Scikit-learn, XGBoost, Logistic Regression, Random Forest, Support Vector Machine, Regression, Classification

AI / LLM: OpenAI API, Google Gemini API, RAG, Resume Parsing, Prompt Engineering, LLM Application Development

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn

Deployment / Frameworks: Streamlit, Django

Tools: Git, GitHub, Jupyter Notebook, Kaggle, Power BI

Concepts: Data Preprocessing, Feature Engineering, Model Evaluation, Hyperparameter Tuning, API Integration

PROJECTS

AI Job Recommender System

GitHub: [View Project](#)

Tech Stack: Streamlit, OpenAI API, Google Gemini API, Apify, PyMuPDF, Python

- Developed an AI-powered web application that recommends relevant jobs based on resume analysis and extracted candidate skills.
- Integrated OpenAI and Google Gemini APIs for resume parsing, skill identification, and intelligent job matching.
- Connected external job data sources using Apify and implemented resume text extraction using PyMuPDF.
- Demonstrated skills in recommendation systems, LLM application development, API integration, and AI-driven workflow design.

Smart Document Q&A Chatbot

GitHub: [View Project](#)

Tech Stack: Python, Streamlit, Google Gemini API, ChromaDB, Hugging Face, PyPDF2

- Built a document-based question answering chatbot that allows users to upload PDF and TXT files and ask context-aware questions.
- Implemented a RAG-style workflow using embeddings and vector search to retrieve relevant content before answer generation.
- Used ChromaDB for vector storage, Gemini API for response generation, and Streamlit for an interactive user interface.
- Showcased practical knowledge of generative AI, semantic search, document intelligence, and LLM-powered application development.

Machine Learning Projects Portfolio

GitHub: [View Project](#)

Tech Stack: Python, Scikit-learn, XGBoost, Pandas, NumPy

- Built 12+ supervised machine learning projects across healthcare, finance, and real estate domains.
- Developed models for diabetes prediction, heart disease diagnosis, wine quality classification, credit card fraud detection, and price prediction.
- Applied algorithms including Logistic Regression, Random Forest, XGBoost, Support Vector Machine, Linear Regression, and Lasso Regression.
- Strengthened practical skills in predictive modeling, feature engineering, model selection, and evaluation of machine learning systems.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

Vidya Jyothi Institute of Technology, Hyderabad | 2021-2025
